

AFRICA WAREHOUSING SCHEME

Call for expression of interest for warehousing facilities in Mozambique

The Africa Warehousing Scheme (AWS) has been introduced by Government as per Budget 2020/21. The objective of the scheme is to provide a subsidy on the rental and administrative costs of warehouses in selected African countries, so as to support access and increase competitiveness of locally manufactured products in these markets. **Government supports the first two years of operations of “Made in Mauritius” warehouses, on a cost-sharing basis between Government (60%) and the private sector (40%).**

This call for expression of interest aims at gauging the interest of Mauritian manufacturing enterprises to embark on the AWS for Mozambique, while at the same time taking cognizance of their requirements in terms of warehousing facilities.

The completed questionnaire should be submitted to the following email address manufacturingtraditional@edbmauritius.org by 20 January 2021.

Name of company			
Designation		Mr / Mrs / Ms :	
Tel		Mobile	
Email			
Website			
Products exported	HS Code (8 digits)	Description
